

Architectural Lighting Products

EAE

It is now easier to express the beauty and splendor of architectural buildings not only in daylight but also at night with the help of emerging LED technology.

In this catalog, EAE presents RGB and DMX controllable LED architectural lighting products.

LED Technology

Rapidly developing technology in LED luminaires, in comparison to previous light sources, have brought new perspectives into EAE development systems.

Our Research and Development Laboratories together with our design team have built new opportunities by offering the best solutions in the field of lumen.

Thanks to these developments, a new generation of architectural lighting concepts can now be offered by EAE.

EAE Elektrotechnik is one of the leading organizations in Turkey as production technics and production quality in its scope. EAE Elektrotechnik proudly shares its high-efficiency and proper architectural lighting products with the help of the spurt lighting technologies based on engineering infastructure.

Architectural Lighting

Architectural Lighting design should provide a balance between initial operating cost and energy efficiency factors. Also this design technique should accomplish the proper effect for building's characteristics and provide sufficient light in standard lighting level.

Lighting designers intend to use both lighting physiology and psychology in most effective way.

Function and Form Equality

The effects of facades, objects or flora to the human body depends on lighting design. However the effects can be determined by the designers. Our engineers design the suitable products which is for the effects that we want.

Illumination Technology

EAE Elektrotechnik is a safe harbor for designers with the help of engineering products. Our R&D department has been focused on LED technology since 2008. Experts show us that the future lighting technology will be LED.

Sustainability

Illumination needs energy. So both manufacturer, designer and end user are responsible if the resources are limited. EAE Elektrotechnik has a responsible role for using raw materials and energy. Our goal is to optimise illumination efficiency while keeping end-user's need for high quality lighting and visual comfort.

More Qualitative Light

Development in lighting technology shows us the light is not only composed from numbers and amounts, but also forms perception and effects on vision physiology. Lighting which is the fourth dimension in architecture, is necessary for designers to work with an appropriate product. EAE Laboratories are equipped with state-of-the-art technology and equipment paving the way for designing high quality lighting devices with product safety features.

Our products represent quality, reliability and uninterrupted performance. EAE lighting has established itself as a successful brand, providing products and superior customer service as their hallmarks of quality.

Our staff takes pride in providing the necessary information and support in technical specifications, selection of products, delivery and customer service.

MORE SAFER LIGHT

EAE lighting studies the workings of "Light Engineering" on measurements and evaluation in its laboratories. Goniophotometric measurements, spatial distribution of light intensity have been made by the company since 2011.

Founded in 2007, EAE Laboratories conduct safety tests to ensure safer products are produced with a high level of customer satisfaction in mind. The primary goals are to increase product quality and to fulfill product requirements, and it is for these reasons that safety tests are performed according to the EN 60598-1 safety standard. To achieve more secure lighting solutions, luminaires should be tested under various conditions. Under European Standards EN-60598-1, EN 60598-2 tests, EAE luminaires are tested under increasing temperature, humid environment, earth continuity, leakage current, torque, suspension kit safety, physical impact, electrical shock resistance, insulation and corrosion.

The range of testing is carried out on more than 20 different test subjects. Safety tests of electronic drivers are performed in the EAE Laboratory under the auspices of DEKRA according to EN 61347-2-13

standards. All tests under CE-LVD Low Voltage Directives create substructures for European Certification.

Goniophotometers are devices that generate light distribution curves during the designing phase of lighting luminaires, measures glare values and also generates ISOLUX-ISOCANDELA diagrams. These tests are in accordance with EN (CIE) and IESNA standards. Ulbricht Sphere, with a diameter of 2 meters, gives the opportunity to measure spectral measurements, CCT (Correlated colour temperature), CRI (color rendering index), wavelength, colour ratios and the lumen value measurements of light sources.

PROJECT IDENTITY

Employer : Konya Metropolitan Municipality
Architectural Group : Sütüçen Mimarlık (Sütüçen Architecture)
Illumination Design : Sümeyra Gün/ EAE Illumination
Products Implemented : EAE RGB Prolit Compact
LED Projector,
EAE RGB Ledbar,
EAE RGB LED Module,
EAE Wato 3W LED embedded in the wall,
EAE control systems.

Architectural lighting is important fact for corporate identity communication companies. Lighting concept and lighting choice come together to build up spectacular appearance. Corporate culture is powered for employees and visitors. Illuminated buildings are perceived as significant lighting state of art at surrounding city.

Facades are the primarily perceived fact in architecture and being identified by the direction and color of the light at night. Facade appearances are changed due to the changing of the direction of the light during the day. Illumination effects can easily be formed with the help of the different light distributions and lighting control systems. Components of the facades can be perceptible by these systems.

Elmalılı Hamdi Pedestrian Overpass, Konya - Turkey

PROLIT

Physical Specifications :

Body Specs.	: Aluminium injection, electrostatic powder coat body All connection parts are stainless Silicon gasket
Body color	: Specially designed coating for external applications (black,white,grey)
Diffuser	: Tempered glass
Protection class	: IP 65
Weight	: 17,75 - 19,75 kg (MN-W) 13,25 - 15,25 kg (MN-C, MX-TW, MX-RGB)
Dimensions	: 375 x 443 x 251 mm (MN-W) 370 x 337 x 185 mm (MN-C, MX-TW, MX-RGB)

Performance Specification :

Working Temperature	: -20° / +45° C
Rotation Angles	: 210° (Fixable unit for every 5° angle)
Light Source	: Power LED
Color Options	: Pure white, neutral white, warm white, Red, Green, Blue, Amber Tunable white, RGB

Electrical Specifications :

Working Voltage	: 220 - 240 V AC 50/60 Hz (MN-W, MN-C, MX-TW) 24 V DC (MX-RGB)
Rated Power (W)	: 100 (107) W / $\cos \varnothing > 0,9$ (100 W Model / MN-W) 150 (158) W / $\cos \varnothing > 0,9$ (150 W Model / MN-W) 210 (218) W / $\cos \varnothing > 0,9$ (210 W Model / MN-W) 50 (55) W / $\cos \varnothing > 0,9$ (50 W Model / MN-C, MX-TW, MX-RGB) 75 (83) W / $\cos \varnothing > 0,9$ (75 W Model / MN-C, MX-TW, MX-RGB)

Application Areas :

Facade lighting, commercial lighting, sport areas lighting
harbor / open area / open car parks, high rise buildings facade lighting.

MX-RGB RGB

BANTWASHER SLIM

Physical Specifications :

Body Specs.	: Aluminium injection, electrostatic powder coat body
Diffuser	: Polycarbonate
Protection class	: IP 67
Weight	: 0.5 kg - 6 LED (MN-W,MN-C) 0.5 kg - 18 LED (MX-RGB) 1,5 kg - 12 LED (MN-W,MN-C) 1,5 kg - 36 LED (MX-RGB) 2,5 kg - 18 LED (MN-W,MN-C) 2,5 kg - 54 LED (MX-RGB) 3,5 kg - 24 LED (MN-W,MN-C) 3,5 kg - 72 LED (MX-RGB)
Dimensions	: 254 x 67 x 68 mm - 6 LED (MN-W, MN-C) 254 x 67 x 68 mm - 18 LED (MX- RGB) 504 x 67 x 68 mm -12 LED (MN-W, MN-C) 504 x 67 x 68 mm - 36 LED (MX-RGB) 754 x 67 x 68 mm - 18 LED (MN-W, MN-C) 754 x 67 x 68 mm - 54 LED (MX-RGB) 1004 x 67 x 68 mm - 24 LED (MN-W, MN-C) 1004 x 67 x 68 mm - 72 LED (MX-RGB)

Performance Specification :

Working Temperature	: -20 C /+25°C
Rotation Angles	: 130°
Light Source	: Power LED
Color Options	: Pure White, Neutral White, Warm White, Tunable White, Red, Green, Blue, Amber, RGB
Angle Options	: 10° / 15° / 30° / 45° (White, Mono color) 18° / 26° / 30° (Tunable White, RGB)

Electrical Specifications :

Working Voltage	: 24 V DC
Rated Power (W)	: 11 W - 6 LED (MN-W, MN-C) 26 W - 18 LED (MX-RGB, MX-TW) 17 W - 12 LED (MN-W, MN-C) 52 W - 36 LED (MX-RGB, MX-TW) 25,5 W - 18 LED (MN-W, MN-C) 78 W - 54 LED (MX-RGB, MX-TW) 34 W - 24 LED (MN-W, MN-C) 104 W - 72 LED (MX-RGB, MX-TW)

Application Areas :

Facade lighting, Concealed Lighting, Billboard Lighting

Physical Specifications :

Body Specs.	: Aluminium injection, Painted Housing O-ring
Body color	: Specially designed coating for external applications (black,white,grey)
Diffuser	: Glass
Protection class	: IP67
Weight	: 0,8 kg
Dimensions	: Ø75x148x210

Performance Specification :

Working Temperature	: -20° /+25° C
Rotation Angles	: 180° (all directions)
Light Source	: Power LED
Color Options	: Pure White, Warm White, Neutral White Red, Green, Blue, Amber, Tunable White, RGB
Angle Options	: 19°, 30° (White, Mono Color) 22°, 29° (RGB, Tunable White)

Electrical Specifications :

Working Voltage	: Mono color, White - 220V AC RGB, Tunable White - 12 V DC
Rated Power (W)	: 6 (7.8) W - 6 LED

Application Areas :

Project Basis Special Solutions

Lumifasart medifacade solutions is based on "Pixelmesh" and "Pixelstick" which are controllable RGB LED pixels.

Lumifasart make special solutions for project basis.

- Resistance for outdoor conditions and UV rays
- Easy mount option for replacing
- Dynamic visual content for advertorial purposes
- Tough mechanical design
- Less connection point for less weight on mounting surface

RGB / TUNABLE WHITE and DMX UNITS

TOPOLOGY

RGB

RGB is abbreviation for RED, GREEN AND BLUE. You can make different color variations by changing the brightness of these 3 LED's with the help of the RGB control units.

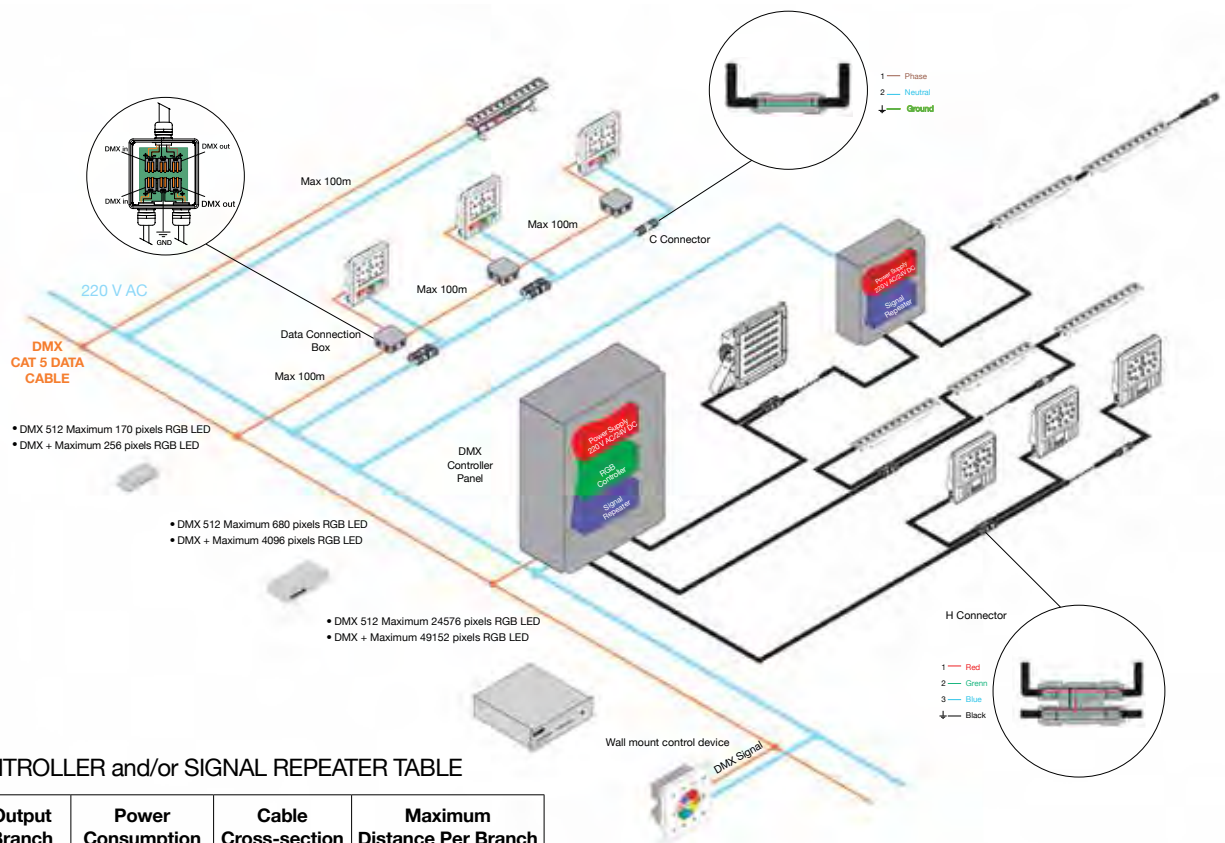

TUNABLE WHITE

It is important to determine the right color temperature due to the illuminated place specifications and functions. This system works by the changing the brightness of 3 white LEDs (warm white, neutral white, pure white) inside of the luminaire with the help of the RGB control system units.

DMX CONTROL

DMX- (Digital Multiplex) is a communication protocol in lighting industry for communicating remotely intelligent luminaires. DMX 512 is widely using in show business. DMX 512 can communicate up to 512 devices. DMX protocol works with the basis of master / slave structure and has a system unit of minimum 1 master DMX control unit, 1 slave dimmer and 1 luminaire. If the controllable distance increase between luminaires and control unit, signal repeater must be used.

DMX CONTROL UNITS

CONTROLLER and/or SIGNAL REPEATER TABLE

Panel Power (W)	Output Branch Number	Power Consumption Per Branch (W)	Cable Cross-section (mm ²)	Maximum Distance Per Branch (m)

96413 LED RGB Control Units

96413 is a multi-function RGB controller that built-in 32 modes. Adopting advanced PWM (Pulse-Width Modulation) control technique, Changing effect is smooth without flicker. Adopting hi-power MOS driver, RGB 3 channels output and total current up to 18A, Unique touch technique, Controller has 8 touch buttons, Which are used for choosing power on or off, pause, modes changed, speed, LED brightness, etc. Also can use RF wireless remote control for long-distance control. The controller has learning function, Which suits remote control with different mode & coded address, Automatically adapt to DC12-24V voltage input, Suitable for major & conventional LED products, Such as LED strip, LED module. Etc. Simply put, As long as low voltage LED lights whose current limited by resistor. Then 96413 can control.

Input Voltage	: DC12V ~ DC24V
Maximum Load Current	: 6A/CH x3 Max. 18A
Maximum Load Power	: 216W/43W(12V/24V)
Remote Control Range	: 50m with obstacles : 100 m without obstacles
Working Temperature	: -30°C~ 55°C
Dimensions	: L 211 x W 40 x H 30 (mm)
Weight	: 250

96411 LED RGB Signal Repeater

96411 Signal Repeater unit has 3 RGB outputs which can be controlled by PWM. It has an output of 3 ampere per channel (total 24 ampere)

Input Voltage	: DC12V~DC48V
Maximum Load Current	: 8A/CH*3CH Max. 24A
Maximum Load Power	: 288W/ 576W/ 864W/ 1152W/ (12V/24V/36V/ 48V)
Working Temperature	: -30°C~65°C
Dimensions	: L 148 x W 87 x H 23 (mm)
Weight	: 380 gr.

96414 LED RGB Signal Repeater

96414 Signal repeater is a 3 RGB output and PVM controllable unit. It has 5 ampere per branch, totally 15 A output current.

Input Voltage	: DC12V-DC24V
Maximum Load Current	: 5A/CH*3CH Max. 15A
Maximum Load Power	: 180W/ 360W (12V/24)
Operating Temperature	: -35°C~55°C
Dimensions	: L 121 x W 39 x H 39 (mm)
Weight	: 100 gr.

96403 DMX Control Unit

96403 DMX control unit is a micro controller with user-friendly, Lighting-effect-editing software; it applies the standard DMX-512 or DMX+ communication protocol to link with all standard DMX-512 Driver/Converter or Lighting fixtures. User can create the own lighting effects by PC software or just select built-in 16 different ones via IR remote control. Max. 170 (DMX 512) or 256 (DMX+) pixels can be controlled by 96403 DMX control unit.

Control Capacity	: 256RGB pixels
Display Patterns	: -16 built-in segments -16 user-defined segments -8 programmable 1-32 compound segments
Flash Memory	: 2M Bytes for 16 user-defined segments & 8 programmable 1-32 compound segments
Computer Interface	: USB-2.0
Remote Control Interface	: IR
Communication Protocol	: DMX-512 or DMX +
Communication Interface	: RS485 via RJ-45 connector
Software Support	: Lighting effect or Animation
LED Indicator	: Green:Power ON/OFF Yellow:RS-485 / DMX OUT Red:IR remote /USB
Voltage Input	: DC 8.0-24 V
Environmental Factors	: Operating Temperature: 0-60°C, Operating Humidity: 10-90 (RH)
Dimensions	: 163x68x30mm

96404 DMX Control Unit

96404 DMX Lighting Controller is an ARM-based controller with a user-friendly software. A breakthrough with unique DMX+ technology, the control capability of 96404 is expandable to 4,096 RGB pixels. In addition, an outstanding feature of 96404 is its OLED touch panel, which is easy to control and ensure a less time-consuming adjusting process.

Control Capacity	: 4096 pixels
Data Storage	: 2M on board Flash Memory
Computer Interface	: TCP/IP, USB, RS485
Communication Protocol	: DMX512 OR DMX+
Communication Interface	: RS485
Control Panel	: LED panel and keypad
Software Supported	: Animation
Input Voltage	: DC 8.0-24 V
Environmental Factors	: Operating Temperature: 0 -50°C Operating Humidity: 10% ~ 90% RH
Dimensions	: 163x68x30mm

96405 DMX Control Unit

96405 DMX Lighting controller is an integrated control system from DVI signal of computer converted to the thousands pixels of the mapping address. Device lets you switch the mapping address flexible which is especially for synchronously display and the irregular architectural features.

Input Voltage	: 110-220 VAC
Power Consumption	: 40 W
Supported Pixels	: 1 unit supported up to 49152 pixels (256x192);Max up to 800x600 pixels*1
Input Data Format	: DVI-D signal (800x600)
Input Control Interface	: Ethernet (RJ-45)
Control Panel	: LCD Display/LED Indicator/4 Control Buttons /Power ButtonLCD
Output Data Format	: DMX+ protocol
Output Interface	: Waterproof DIN connector-8 pin
Environmental Factors	: Operating Temperature: 0 -50 °C Operating Humidity: 10 - 80 (RH)
Dimensions	: 483.0 x 461.2 x 132.8 (mm);19 " 3U Rack chassis

96406 DMX Signal Repeater

96406 DMX Repeater is designed to extend the series connection ability when the connected devices are more than 170 devices. When the transmission distance is more than 100 meters, DMX Repeater can increase the transmission distance. It provides two the same signal output ports for DMX512/DMX+ system.

Input Voltage	: DC12-40V
Power Consumption	: 40 W
Signal Input	: DMX+ / DMX512 (Standart RS485 Differential Signal) a) Nonpolar DMX Connection b) DMX 512 / DMX + Otomatic Detection
DMX Output	: DMX + / DMX 512 (Standard RS485 Differential Signal) pointed signal and range extended signal
Transmission Distance	: Up to 100 meter
Protection class	: IP 66
Environmental Factors	: Operating Temperature: -20-60°C Operating Humidity: 10-90 (RH)

96407 DMX Signal Distributor

96407 DMX Signal Distributor unit, distribute incoming DMX 512 or DMX+ to 4 different output signals.

Input Signal	: 4 port DMX + / DMX 512
Output Signal	: 4 port DMX + / DMX 512
Protection Class	: IP 66
Environmental Factors	: Operating Temperature: -20°C / -60°C Operating Humidity: 10% - 90% RH

Junction and Connectors

Connectors that are used in RGB and DMX control systems can control more than one luminaires. Product has IP 65 protection class and has one input and two outputs.
